

Name of the data set	Organization	Brief description of the data set
Water Outages	SAWS	Data contains locations and outages, duration and reason
Water Pumpage	SAWS	Rainfall, pumpage and well level data on a daily basis
Affordability	SAWS	Customers currently utilizing affordability assistance as, type, level and location, by zip code
Consumption	SAWS	Consumption, in CF? by customer, type of customer and date
Rate Tiers	SAWS	Billing rate tiers and categories
TCI Daily Work Order	CoSA	This excel file contains Street Maintenance work order information from Jan 1, 2017 to August 13, 2018. Data is summarized by work order and only contains those work orders that crew data has been inputted by staff. There may be other work that staff has not inputted into the system.
TCI Daily Work Order	CoSA	This tab contains the work order information and the related cost data. The key field is the WO ID field.
TCI Daily Work Order	CoSA	This tab contains the performance related data (number of pot holes filled, length of guard rail fixed, etc.). The key field is the WO ID field. Note that there may be more than one type of work for each work order (one to many) so be careful tying it to the WO and Cost Data Tab.
311 Calls Data	CoSA	Information on cases opened as result of citizen calls to 311. Data dictionary that includes details on each column provided in file 311DataExtractDataDictionary.
Right Of Way Permit History	CoSA	Information about Right of Way permits.
All permits issued from the Development Services Office	CoSA	Permits issued and not issued by Development Services Department. Zip file includes data dictionary with detailed explanation of the columns.
Bike Share Data	CoSA	Usage details from the bike share program for years 2013 through first half of 2018.
Streets and Sidewalks Inventory	CoSA	Application files exported from ArcGIS. Files with .dbf extension can be opened in Excel and contain various data, including index signifying condition of the streets and sidewalks.
Air Quality	CPS	A write up about this data is available on the AWS S3. This Data set has air quality sensor data from 10 sensors across San Antonio which collects data every hour. You need to download the data from the weblink provided

Power Prices	CPS	
Load/ Power usage data	CPS	
EV Charge station data	CPS	
Weather Data	CPS	Weather Data with various details and measured at different altitudes from ground up
VIA Metropolitan Transit GTFS Data	VIA Metropolitan Transit	The General Transit Feed Specification (GTFS), also known as GTFS static or static transit to differentiate it from the GTFS realtime extension, defines a common format for public transportation schedules and associated geographic information. GTFS "feeds" let public transit agencies publish their transit data and developers write applications that consume that data in an interoperable way.
VIA Metropolitan Transit GTFSRT Real Time Feed	VIA Metropolitan Transit	GTFS Realtime is a feed specification that allows public transportation agencies to provide realtime updates about their fleet to application developers. It is an extension to GTFS (General Transit Feed Specification), an open data format for public transportation schedules and associated geographic information. GTFS Realtime was designed around ease of implementation, good GTFS interoperability and a focus on passenger information.
VIA Metropolitan Transit GTFSRT - Trip Updates	VIA Metropolitan Transit	
VIA Metropolitan Transit GTFSRT - Vehicle Positions	VIA Metropolitan Transit	
VIA Metropolitan Transit GTFSRT - Service Alerts	VIA Metropolitan Transit	
Water Quality Sample Data	SARA	Multiple water quality data parameters collected from SARA operated sampling stations within Bexar County from 2015-2018. (220 total fields)
Rainfall Gauge Data (Dams Telemetry)	SARA	Automated data stream of rainfall amounts at SARA owned and operated dams.
